Summary

A game developer based in Ho Chi Minh City with 1 year of professional experience shipping mobile titles using Unity. Passionate about crafting unique gameplay experiences — from hyper-casual puzzle mechanics to building games from scratch with C++ and SFML. Runner-up at the Voodoo Game Jam 2026. Quick to learn new technologies and confident working in English-language environments.

Experience

MGIF – Game Developer March 2026 – Oct 2026

- Collaborated closely with POs and Designers to build game mechanics and a level editor across 3 mobile titles.
- Researched and implemented algorithms to realize complex gameplay systems.
- Optimized performance to ensure a smooth player experience on a wide range of devices.
- Techstack: Unity, C#, Mobile

Tenefic Games — Zlab Studio – Game Developer Oct 2025 – March 2026

- Designed and implemented game mechanics and a level editor for two hyper-casual mobile titles (Yarn Fever, Color Crusher).
- Optimized the render pipeline and memory usage to achieve stable frame rates across a wide range of devices.
- Worked with designers to craft high-quality UI/UX experiences covering gameplay layout, booster systems, and animation flow.
- Implemented additive scene loading to manage and optimize game flow architecture.
- Techstack: Unity, C#, Mobile

Apps Cyclone Technology JSC – Intern Unity Game Developer Dec 2024 – Jan 2025

- Integrated Firebase SDK (Authentication, Firestore, Realtime DB, Remote Config, Crashlytics, Analytics) to enhance backend functionality.
- Implemented mediation SDKs (Google AdMob, IronSource/LevelPlay) to maximize in-app advertising revenue.
- Developed and deployed games for Android, WebGL, Desktop, and Telegram.
- Designed and implemented socket-based multiplayer functionality.
- Created and integrated custom DLLs written in C++ to extend Unity capabilities.
- Optimized game memory and performance.

Projects

Color Crusher — Tenefic Games / Zlab Studio 2026

- Tap-and-smash block destruction puzzle game for mobile. Players collect items, fill a progress bar, and conquer hundreds of challenging levels.
- **Runner-up at Voodoo Game Jam 2026** — praised for satisfying gameplay loop and polished visual feedback.
- Techstack: Unity, C#

Yarn Fever — Tenefic Games / Zlab Studio Oct 2025 – March 2026

- Mobile puzzle game about untangling colorful yarn strands from crocheted objects and sorting them into matching color slots.
- Improved performance through draw call optimization and algorithm enhancements, resulting in higher FPS, reduced device heating, and smoother gameplay.
- Techstack: Unity, C#

Ray Tracing — Personal Project March 2025 – Now

- Exploring ray-tracing fundamentals including path tracing by building a renderer with support for Lambertian, metal, and dielectric materials.
- Developed a minimal 3D rendering engine with camera system, material handling, scene composition, and sphere rendering.
- Techstack: C++, CMake

My Coffee Shop — Apps Cyclone Technology JSC Dec 2024 – Jan 2025

- Grid-based mobile restaurant management game inspired by Animal Restaurant, featuring NPC behavior system, menu unlocking, and table upgrades.
- Integrated Firebase SDKs (Realtime DB, Remote Config, Crashlytics, Analytics) and login via Google/Facebook.
- Integrated IronSource/LevelPlay (Banner, Interstitial, Reward Ads).
- Developed a custom C++ DLL for A* pathfinding and imported it into Unity.
- Techstack: Unity, C#

Void Raiders — Personal Project 2022

- Fast-paced bullet hell space shooter built from scratch; player pilots a fighter craft through dense waves of enemies and projectiles.
- Implemented custom rendering, collision detection, particle systems, and enemy AI without a game engine.
- Techstack: C++, SFML

Achievements

2nd Place — Voodoo Game Jam 2026 *2026*

- Secured runner-up with *Color Crusher*, a block-destruction puzzle game praised for its satisfying gameplay loop and polished visual feedback.

Education

University of Science – VNUHCM, BS in Information System Sept 2021 – 2025

- **Coursework:** Data Structures & Algorithms, OOP, Mobile Application Development, Game Development, Database Management Systems, Data Security and Protection.

Skills

Languages: C#, C++, GDScript, JavaScript / TypeScript, SQL, Python

Game Engines / Libraries: Unity, Godot, Phaser, SFML

Graphics: Shader / HLSL

AI Tools: Claude Code, MCP (Model Context Protocol)

Tools: Git / GitHub, GitLab, Visual Studio, Visual Studio Code, Android Studio

Other: Game Design, UI / UX Design, Firebase SDK, Ad Mediation (AdMob, IronSource)

Language: English (TOEIC — LR: 870 | SW: 290)
